Summary

Senior backend engineer, 9+ years building scalable systems across Salesforce, Amazon and McAfee. Currently leading the development of Agentic Content Studio at Salesforce using Mastra Harness, Python and React. Passionate about shipping real AI products that solve customer problems at scale.

Also ship developer tools at [ai-sdk-patterns.dev](#) 📄, [paymint.dev](#) 📄, and [claude-crux](#) 📄 .

Work Experience

Senior Software Engineer - Marketing Cloud 02/2024 – Present | Bangalore, India
Salesforce

- Architecting the Agentic Content Studio - a multi-turn agent platform for Marketing Cloud, built using React (frontend), FastAPI (python) and Mastra framework (node).
- Designed the core runtime on Mastra's Harness primitive: per-thread state, observational memory, skills, tools catalog and it's APIs, image generation and Human-in-loop.
- Led integration of Marketing Cloud Engagement (MCE) SMS traffic with Unified SMS platform on the Falcon AWS platform – modernized legacy infrastructure and reduced aggregator onboarding time from months to weeks.
- Spearheaded integration of a competitive SMS aggregator across LATAM and East Asian traffic, yielding ~\$10M in annual customer saving. (Q3 2024 Quarter Award)

Software Development Engineer 2 - Appstore 10/2021 – 08/2023 | Bangalore, India
Amazon

- Engineered the AutoFailure framework that automated developer communication for app submission failures, lifting zero-touch provisioning by ~6.5%.
- Reduced automation test false-negative rate by 12%, cutting manual verification load.
- Reduced App-details query latency by 50% via data-flow redesign.

Software Engineer 06/2016 – 09/2021 | Bangalore, India
McAfee

- Optimized a Router API's database + network path, reducing traffic and storage by ~40%.
- Diagnosed and fixed a subscription-failure loop that was creating DDoS-class retry storms back to our platform.
- Generalized partner-specific customizations into the core product, cutting partner-specific code by ~50%.

Skills

- | | | |
|--------------|-------------|-----------------|
| • Agentic AI | • Python | • Typescript |
| • LLMs | • Next.js | • Microservices |
| • AWS | • Redis | • PostgreSQL |
| • DynamoDB | • Mastra AI | • Claude |

Education

Master's Degree, Computer Science, Nirma University 07/2014 – 05/2016 | Ahmedabad, India

Bachelor of Engineering, Computer Science, NSIT 08/2009 – 05/2013 | Ahmedabad, India

Projects

[Paymint.dev – Paddle Payments SDK](#)

Type-safe Paddle integration for Next.js apps that eliminates webhook parsing, synchronization logic, and boilerplate.

[AI SDK Patterns](#)

Open-source library of 23+ provider-agnostic patterns on the Vercel AI SDK — streaming chat, multi-step agents, RAG, tool calling, generative UI, structured output, HITL.

[Crux – Claude Code Context Plugin](#)

Causal-graph-based context management system to reduce hallucinations in long-running coding agents — evicts by causal irrelevance instead of recency.
